Occu Lid Care

DRESSING, FLUID-IMPERMEABLE FILM

Packaging Unit: 2 sheets /pack, 10pack/box, 20pack/box

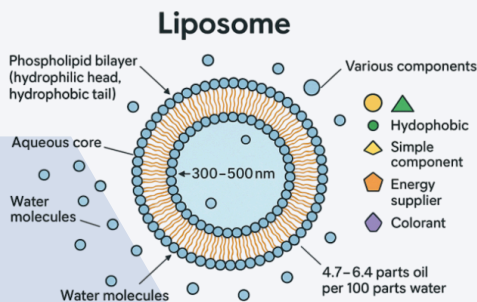

Expiration Date: 3 years from the date of manufacture. Use immediately after opening.

Single-use only. Do not reuse.

✓ A sheet impregnated with a nanoemulsion formulation

Forms a protective barrier on the skin

Conventional oil-containing microemulsions are difficult to impregnate into sheets;
This formulation was developed using nanoemulsion technology to enable effective sheet impregnation.

✓ Nano-liposome Formulation

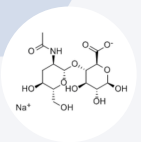

- A structure in which oil-containing liposomes are embedded in a water-soluble matrix.
- An oil-containing emulsion that forms a protective barrier on the skin

✓ Tests completed

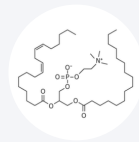

- Skin Sensitization Test
- Intradermal Reactivity Test
- Cytotoxicity Test

✓ Ingredients

Sodium Hyaluronate
Moisturizing and forming a skin barrier

Hydrogenated Lecithin
Maintains deep hydration over time

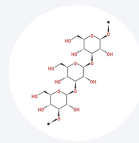

Madecassoside Mixture
Promotes skin regeneration and provides anti-inflammatory effects

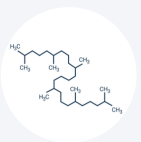

Asiaticoside
Strengthens the skin barrier and reduces inflammation

Ceramide NP
Restores the skin barrier and provides moisturization

β-Glucans
Regulates immunity and promotes wound healing

Squalane
Forms a protective barrier and prevents moisture loss

Allantoin
Soothes the skin and supports wound recovery
